Hannelore:

A German name comprised of two names, Hanne a short form of Johanna and Eleanore a variant of Aenor.

The meaning of Hanne – Gracious
Eleanore – Bright One, Shining One

Who is she?

Discreet and reserved in appearance, Hannelore is a sociable and communicative lady. She is wary and quite selective, which means that she doesn't take friendship lightly and tends to remain on the defensive at first. Rather distant, she nonetheless possesses a certain distinction. Active and resourceful, she feels the need to affirm herself, which is not always an easy task.. Her efforts can be inconsistent, slowed down by worry, doubt and uncertainty. She is perfectly capable, however, of assuming her responsibilities and can be very brave if necessary. She proves to be particularly efficient when faced with real difficulty, and is able to take charge of a situation with a natural authority that is above all suspicion. She is concerned about her image and wishes to be a living breathing example to others.

Who is Hannelore to me:

She was my neighbor and quickly became my good friend. She helped my transition to the neighborhood and filled me in on everything I needed to know about gardening, plants, weed killing, cleaning my gutters, so many things in and around the house.

She was never pushy or assuming, she respected you. The advice she passed along to me was so helpful.

We helped each other as friends do, and in that became closer and shared our lives to each other.

Hannelore has seen and done a lot of things in her 89yrs and I'm glad she shared some of that with me. We had a lot of laughs and at the end heartache. She was a strong woman, it was subtly empowering to me.

I will miss you Hanne and will think of you often.

Love to you my friend, Sue
